

*“Materials Science: Advances in Synthesis, Characterization and Applications”* is an open access, peer-reviewed volume published by Advent Publishing. The book highlights cutting-edge advancements in materials synthesis, innovative characterization techniques, and emerging applications across multiple fields of science and technology.

Edited by Digambar M. Sapkal, Harshal M. Bachhav, Gaurav Mahadev Lohar, and Sanjay P. Khairnar, this collection brings together contributions from leading researchers and experts worldwide. Each chapter is assigned a unique Digital Object Identifier (DOI), ensuring wide discoverability and ease of citation across academic platforms. The book's high editorial and peer-review standards reinforce its credibility and relevance within the global scientific community.

Spanning topics from nonlinear optical crystals and rare earth nanomaterials to biocompatible polymers, electrochemical storage materials, and computational studies, the volume reflects the dynamic and interdisciplinary nature of modern materials science. It aims to provide readers with a comprehensive understanding of both fundamental principles and applied innovations shaping the future of scientific research and industrial development.

Advent Publishing continues its pursuit of academic excellence through this publication, providing an accessible platform that promotes open dissemination of scientific knowledge. *“Materials Science: Advances in Synthesis, Characterization and Applications”* stands as a valuable resource for researchers, educators, and students engaged in scientific discovery and technological innovation.
